12. Port : Enter <993>

A screenshot of a mobile application's 'Server settings' screen. The screen is titled 'Server settings' with a back arrow on the left. It is divided into two main sections: 'Account' and 'Incoming server'. The 'Account' section contains three input fields for 'Email address', 'Username', and 'Password'. Below these fields is a red error message: 'Incorrect email address or password entered.' and a radio button labeled 'Show password'. The 'Incoming server' section contains three input fields: 'IMAP server', 'Security type' (with a dropdown menu currently set to 'SSL'), and 'Port'. At the bottom of the screen, there is an 'IMAP path prefix' input field and a 'Sign in' button. The bottom of the screen shows a mobile navigation bar with three icons: a hamburger menu, a home button, and a back arrow.

17. **User Name:** Enter your **email address**
(e.g.user@example.com)
18. **Password:** Enter your **email account password**
19. Click **<DONE>** and Email account added

A screenshot of an email client's 'Server settings' screen. The screen is titled 'Server settings' with a back arrow on the left. It shows various settings for an email account. The 'Outgoing server' section is highlighted with a grey background. Below this section, there are fields for 'SMTP server', 'Security type' (set to 'SSL (Accept all certificates)'), 'Port', 'Require authentication to send emails' (a toggle switch that is turned on), 'Username', and 'Password'. At the bottom of the screen, there is a 'Done' button and a navigation bar with three icons: a hamburger menu, a circle, and a back arrow.
